

INTERNATIONAL GOOD MANUFACTURING PRACTICE STANDARD FOR CORRUGATED AND SOLID BOARD PACKAGING

QUALITY, SAFETY, HYGIENE

GMP is a standard which covers the manufacturing of packaging made of corrugated and solid board so as to satisfy market demands for hygienic requirements such as exist in the food industry.

A European Standard

The standard is based on independent auditing by an EN 45011 accredited certification body

Top Level Safety and Hygiene Criteria

GMP guarantees that corrugated and solid board packaging fulfill all **Quality, Safety** and **Hygiene** requirements

Third Party Auditing

Safeguards the independence thus objectivity of the auditing and certification process

No Need for Multiple Audits

GMP meets all the criteria used by other standards such as BRC/IOP, MCAS, etc...

A Single and Transparent Standard

for all Solid and Corrugated Board Packaging (N°1 transport Packaging in the world)

A Guarantee Against Law Suits

GMP is an exercise in Due Diligence

A Marketing Tool

GMP certified packaging means added value for your customer

Check out www.fefco.org/gmp for more information and the latest updates

« With GMP we can now satisfy all of our customers' hygiene requirements. No extra costly audits are necessary, and GMP is easily integrated into other systems such as ISO 9000 »
