

CORRUGATED: A VITAL SAFETY AND HYGIENE LINK FOR THE SUPPLY CHAIN

Corrugated Packaging is a high performance concept designed to protect and promote goods. Use corrugated packaging and be assured that it is also the safest and most hygienic choice.

FEFCO
European Federation of
Corrugated Board Manufacturers

- ▲ Corrugated packaging poses no risk to human health or to the products' organoleptic properties.
- ▲ Corrugated Packaging protects all types of products and minimises damage and waste along the supply chain.
- ▲ Corrugated packaging requires no washing or drying, thus no water or detergents, in order to be safe.

The International Good Manufacturing Practice standard (GMP), launched at the end of 2003, ensures that corrugated and solid board packaging meet all the requirements of quality, safety and hygiene such as exist in the food industry. Such a transparent standard, adapted to the material, also respects all its specific qualities (versatility, lightness, strength, recyclability). requirements such as exist in the food industry.
